**October 13th & 14th
Louisville, KY**

Clinical Chiropractic Spinal Concepts
Taught in this seminar are clinical chiropractic spinal concepts that will streamline your practice and improve patient outcomes.

This seminar consists of a workshop concept of clinical physical medicine techniques, chiropractic adjusting techniques, with emphasis on a streamlined physical examination of the spine.

In addition, this seminar will emphasize an in-depth exploration of neurometabolic concepts based on the Meric Theory. Beyond simple spinal neurological mapping, comprehensive patient care will include spinal subluxation reduction, spinal support using knowledge of organ systems and its relationship with Meric's concepts.

Attendees utilizing the concepts taught in this seminar, will experience an enhanced patient outcome resulting in greater referrals.

The Sunday portion of this seminar will contain the following overview of ancillary techniques and treatments expanding the concepts from Saturday's portion, this will include:

- Organs and System Review
- Kinesiology Examination
- Nutritional and Metabolic Support
