Cytozyme-PT/HPT™

Why you may need Cytozyme-PT/HPT™: The Pituitary Gland (PT) is divided into the anterior and posterior pituitary. It is often referred to as the master gland, as it secretes a battery of hormones that collectively influence all cells, and affect virtually all physiologic processes in the body. For example, the anterior pituitary secretes thyroid stimulating hormone (TSH) and growth hormone, while the posterior pituitary secretes the hormones vasopressin, also called anti-diuretic hormone, and oxytocin.

The hypothalamus (HPT), the power house behind the pituitary, secretes hormones that strictly control secretion of hormones from the anterior pituitary. Located below the thalamus (brain area that relays sensory information) and above the pituitary gland and brain stem, the hypothalamus plays a significant role in the endocrine system. Hypothalamic hormones are referred to as "releasing hormones and inhibiting hormones", reflecting their influence on anterior pituitary hormones. An endocrine feedback system involving the pituitary and the hypothalamus controls the secretion of thyroid hormones (T3 and T4) by the thyroid gland, resulting from the production of TSH by the pituitary. The hypothalamus is often noted as the link between the endocrine and nervous systems.

Why your healthcare practitioner recommends Cytozyme-PT/HPT[™] from Biotics Research: Cytozyme-PT/HPT[™] supplies a proprietary source of young lamb pituitary/hypothalamus concentrate. Your healthcare provider may recommend Cytozyme-PT/HPT[™] if they determine that you may benefit from targeted, specific glandular support. Cytozyme-PT/HPT[™]; another example of Biotics Research bringing you "The Best of Science and Nature."

Supplement Facts Serving Size: 1 Tablet	
Lamb Pituitary/Hypothalamus Complex Concentrate (ovine)	40 mg*
Superoxide Dismutase (from vegetable culture	†) 30 mcg
Catalase (from vegetable culture †)	30 mcg
*Daily Value not established	

Other ingredients: Cellulose, stearic acid (vegetable source), food glaze, magnesium stearate (vegetable source) and silica.

† Specially grown, biologically active vegetable culture containing naturally associated phytochemicals including polyphenolic compounds with SOD and catalase, dehydrated at low temperature to preserve associated enzyme factors.

This product is gluten and dairy free.

RECOMMENDATION: One (1) tablet one (1) to three (3) times each day as a dietary supplement or as otherwise directed by a healthcare professional.

KEEP OUT OF REACH OF CHILDREN
Store in a cool dry area

Store in a cool, dry area. Sealed with an imprinted safety seal for your protection.

Product # 3009 Rev. 12/16
