

LYMPH DETOX

Action:

This formula supports blood and lymphatic system detoxification.

Dosage:

Two capsules three times a day, or as directed.

SUPPLEMENT FACTS

Serving size: Two capsules (518 mg. capsule)

Proprietary blend: Sassafras root, Burdock root, Dandelion root, Prickly Ash bark, and Fenugreek seed.

Contains: EDS® (Amylase, Protease, Lipase & Cellulase).

Other ingredients: Gelatin capsules

Details:

Lymph nodes act as a drainage system by absorbing and expelling proteins, dead cells, bacteria and other waste products from the body. They clean and filter the lymph before it is returned to the blood, and act as a major part of the immune system by producing antibodies and lymphocytes. Lymph Detox is designed to support the body by acting upon the blood and lymphatic system, making certain that these vital structures are in good function.

Lymph Detox is a synergistic blend of several key ingredients including Sassafras root bark, Burdock root, Dandelion root, Fenugreek, and Prickly ash bark.

Sassafras root bark tends to support the manufacturing of blood and improve the circulation throughout the body. It is tonic to the liver and digestive system.

Burdock root is considered an herbal sedative as well as a depurative— meaning that it helps cleanse and remove any impurities from the body. Burdock root enhances waste material elimination because of its diuretic properties. This root, originating in Asia and Europe, is known as nature's best blood purifier because of its ability to rid the body of toxins, clear blockages from the circulatory, respiratory, lymphatic and urinary systems, soothe aches and pains, alleviate excess water storage, and aid the body in maintaining healthy skin.

Dandelion root was used historically by Native Americans as a way to treat diseases associated with the kidneys, liver or spleen. This root is used in Lymph Detox specifically because of its ability to stimulate the liver into detoxifying the blood and lymphatic stream. Dandelion root also stimulates bile flow and increases liver secretion.

Fenugreek is considered a lymphatic "detergent"; it helps liquefy viscous lymphatic fluid. It also helps detoxify and increase lymphatic circulation, and aids in relieving constipation.

Prickly ash bark activates the glandular system and mucus membranes in the body. It supports activation of slow circulation in the blood and lymphatic systems. Prickly ash bark also increases secretions of the various ductless glands of the body.
