Proprietary blend: Shavegrass (Horsetail herb), Yucca, White Willow Bark, Valerian root, and Wintergreen.	
Contains: EDS® (Amylase, Protease, Lipase & Cellulase).	
Other Ingredients: Gelatin capsule	

Details:

Total Pain Support is made up of a synergistic blend of herbs that work naturally with the body to relieve pain and inflammation of the joints.

- Wintergreen and White Willow Bark contain natural salicylates that provide a mild analgesic known to naturally relieve pain.
- Horsetail has been used traditionally to relieve rheumatic conditions, including arthritis.
- Yucca helps relieve arthritic pain by acting as a wetting agent to provide lubrication to the joints and help arthritic joints maintain range of motion.
- Valerian Root helps relieve arthritic pain by relaxing the nerves.

Our formula aids the body when dealing with inflammation and pain utilizing natural herbs and supplements free from side effects. Wintergreen and white willow bark synergistically work hand in hand to create a natural form of salicylic acid that is a natural pain reducer, anti-inflammatory, and fever reducer. The natural benefits of these compounds are reputed to have longer lasting effects than similar synthetic or chemically altered compounds created in a lab though it may take longer to act, but without adverse reactions. While valerian relaxes the nerve and reduces pain, yucca acts as a wetting agent providing lubrication to the joints and maintaining range of motion.
