A Unifying Model For Complex & Chronic Patients

Fibromyalgia

Irritable Bowel Syndrome

Chronic Fatigue

Migraine Headaches

Chronic Fatigue Immunodeficiency

Multiple Chemical Sensitivity

Myalgic Encephalomyelitis

Post-Traumatic Stress Disorder

HOLISTIC SOLUTIONS FOR TOUGH CASES

Saturday/Sunday Seminars With Dr. Mark Force

Come Saturday Or Sunday Or Both

Saturday

The Complex & Unresponsive Patient

A Unifying Model For Complex & Chronic Patients

Fibromyalgia

Chronic Fatigue

Chronic Fatigue Immunodeficiency

Myalgic Encephalomyelitis

Irritable Bowel Syndrome

Migraine Headaches

Multiple Chemical Sensitivity

Post-Traumatic Stress Disorder

Sunday

Dr. Force will teach from the newly updated book by Dr. Dan Duffy, Clinical Insights on Structure and Nutrition, that he and Dr. Harry Eidenier Jr. recently updated.

I love to study with physicians whose training is different than mine because they make links to clinical applications that I would never consider. And one of my favorite people to listen to is Dr. Mark Force. He is one of the smartest, kindest people I work with.

Joe Buishas - The Tuesday Minute

Saturday 9:00 - 5:00

**A Systematic Approach For
The Complex &
Unresponsive Patient**

This is your “been everywhere, done everything, seen everyone patient with a laundry list of symptoms and conditions and shopping bags full of pills - prescription and non-prescription - that you don’t quite know what to do with.”

This type of patient also tends to suffer from central sensitization (sometimes called limbic kindling) - their brain is on fire. You can’t treat the symptoms, because they are everywhere! You have to put out the fire.

The “central fire” is the NMDA-glutamate receptor. After that, the dominoes that fall are other neurotransmitters, the autonomic nervous system, mitochondrial function, xenobiotic metabolism and reactive oxygen species (ROS) control.

We will train you in the pathophysiology, biochemistry, diagnostic criteria, therapeutic protocols and essential patient selfcare.

Do you want to be clear about treating patients with fibromyalgia, migraine headaches, IBS, chronic fatigue syndrome, multiple chemical sensitivity and a long list of other complex illnesses? Be at this seminar

After this seminar, you will surely know both how to help these people, or how to refer them out if you decide.

SIGN-UP NOW

BONUS DAY

Sunday 9:00 - 1:00

Clinical Insights On Structure & Nutrition

Dan Duffy, DC was a masterful clinician in general practice who wrote a brilliant manual - Clinical Insights on Structure and Nutrition - summarizing his knowledge base and approach.

Harry Eidenier, Jr., PhD (biochemistry) and Mark Force, DC have recently completed a line by line update of this manual. Newer knowledge of biochemistry and nutrition and the knowledge base of Harry Eidenier and Dr. Force have been incorporated into the manual.

Questions will be welcomed about topics from Dr. Duffy's manual and how to implement the Dr. Duffy's protocols in your practice.

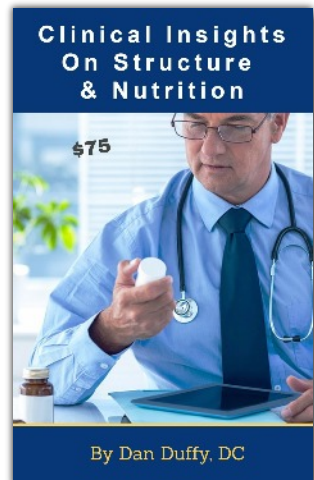

SIGN-UP NOW

**Each attendee will receive the updated book
Clinical Insights On Structure & Nutrition**

Dr. Duffy, master clinician, chewed on, digested, and incorporated into his being the seminal and visionary works of Royal Lee, Henry Harrower, Weston Price, Francis Pottenger, George Goodheart, and others.

Dr. Force will cover some of the essential topics from Dr. Duffy's updated manual especially with regard to the autonomic nervous system, pH regulation, electrolytes, digestion, adrenal function and practical use of glandular therapies in practice.

Seminar Presenter

Dr. Mark Force is a graduate of the University of Western States (Doctor of Chiropractic, 1984), diplomate and instructor for the International College of Applied Kinesiology (DICA, 1990) and fellow and instructor for the International Academy of Medical Acupuncture (FIAMA, 2002). He has served as an editor and contributor for reference manuals on diagnosis and therapies for systems-focused healthcare and partner with the clinical nutrition industry such as index medicus listed research that led to the patent for Biotics Research's A.D.P.® and patent pending ScentArest®.

Very sick with ulcerative colitis, chronic fatigue syndrome and related conditions as a teen, Dr. Force was unable to recover with conventional healthcare and was driven to find answers on his own. Discovering *The Stress of Life* by Hans Selye, MD was the transformative moment that led to his healing and fire for learning and understanding how we, and our patients, heal. Dr. Force has been using a systems-driven model integrating conventional medicine diagnostics with natural therapeutics since 1984.
